

VICTORY OGUNDIPE

FULL-STACK DEVELOPER

Ogbomoso, Oyo State, Nigeria • 07 049 370 819 • victoryogundipe4110@gmail.com
github.com/victory4110 • linkedin.com/in/ogundipe-victory-708875337

PROFESSIONAL SUMMARY

Full-stack developer building complete digital products across responsive interfaces, APIs, databases, desktop applications, and deployment. Experienced with TypeScript, Node.js, React, Next.js, NestJS, MongoDB, and Rust, with hands-on work in education platforms, internal operations, payment workflows, and offline-first systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust, Python, Java, PHP

Backend: Node.js, Express, NestJS, FastAPI, Laravel, REST APIs

Desktop and cloud: Tauri, Docker, AWS, GitHub Pages

Frontend: React, Next.js, React Native, Tailwind CSS

Data: MongoDB, PostgreSQL, MySQL, Redis, SQLite, Firebase, Supabase

Practices: JWT, RBAC, validation, offline sync, Git and GitHub

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Poolot

January 2026 – Present

- Build and improve frontend interfaces and backend workflows for internal business and education platforms.
- Develop admin dashboards, student lookup and management flows, KPI modules, and operational tools using React, Next.js, TypeScript, and MongoDB.
- Contribute payment and transaction integrations, accounting workflows, server actions, validation, and role-based access controls.
- Support ScholarOS desktop and web applications, including local storage, synchronization, Windows packaging, build fixes, and release automation.

SELECTED PROJECTS

ScholarOS | Next.js, TypeScript, Tauri, Rust, SQLite

Contributed student and staff dashboards, local data storage, offline synchronization, desktop installers, build fixes, and release automation for a multi-application school-management platform.

Poolot Admin Operations Platform | Next.js, React, TypeScript, MongoDB

Built and improved admin dashboard interfaces, student-management workflows, transaction integrations, accounting tools, KPI modules, and operational features in a private collaborative project.

DHave Gadgetz Payment QR | Node.js, Express, MongoDB, QR Code

Created a client payment utility that opens verified bank details from a QR scan and provides a one-tap account-number copy action to reduce transfer errors.

Meeting Registration QR | JavaScript, Node.js, GitHub Pages

Built a permanent QR system that redirects to the current registration form, with generated PNG and SVG assets plus automated verification of the encoded destination.
